

IN THE ABSTRACT:

Please amend the Abstract as follows:

An image processing apparatus is provided. The image processing apparatus includes a holding unit ~~comprises~~ hold means for holding setting information for every user, an input unit means for inputting a print job, and an adjustment unit means for specifying a user who instructs the print job according to print job information and adjusting a color image on the basis of the setting information of the specified user.

Accordingly, a precise color adjustment fitting to each user can be realized by providing the profile for the color adjustment for every user.
